

VIVEK KUMAR

Banking & Financial Analytics | Predictive Risk Modeling | Business Intelligence & Data Engineering

Mumbai, India • +91-7351063525 • wewake252@gmail.com • linkedin.com/in/wewake257 • github.com/Wewake257

EDUCATION

TATA INSTITUTE OF SOCIAL SCIENCES (TISS) | M.Sc. in Analytics (Score: 78%)

Mumbai, India | 2025 – 2027

- Quantitative Core:** Predictive Analytics, Financial & Risk Modeling, Econometrics, Machine Learning, Big Data Infrastructure, Time-Series Forecasting, Multivariate Statistical Modeling.

AIHM, CHANDIGARH | B.Sc. in Management (Score: 74%)

Chandigarh, India | 2019 – 2022

- Quantitative Focus:** Operations research, resource allocation modeling, throughput optimization, and variance diagnostics.

PROFESSIONAL EXPERIENCE (2 YEARS 5 MONTHS)

JIO PLATFORMS LIMITED | Predictive Analyst Intern

Mumbai, India | Jun 2026 – Aug 2026

- Predictive Modeling:** Architected end-to-end Predictive Classification Engine in Python (Scikit-Learn, Pandas) forecasting customer behavioral patterns across high-volume datasets, boosting predictive accuracy by 18%.
- Risk & Behavioral Segmentation:** Formulated Success Profile Analysis using supervised classification algorithms to identify high-value customer cohorts and attrition vulnerabilities, informing targeted retention strategies.
- Executive BI Dashboards:** Engineered dynamic Power BI reporting dashboards using complex DAX measures and dimensional star-schema modeling to deliver real-time operational insights directly to leadership.

ORGAKNOW | Data Science Intern – AI Solutions

Dec 2025 – Feb 2026

- Automated ETL Pipelines:** Engineered automated data ingestion and schema validation pipelines in Python processing 10,000+ enterprise records, reducing manual ETL data preparation overhead by 60%.
- Relational Architecture:** Designed standardized fact–dimension models and mapping dictionaries to harmonize multi-source transaction datasets across inconsistent operational schemas.
- Reconciliation & Audit Controls:** Implemented automated reconciliation controls (roll-up validation, period-over-period variance testing) to guarantee 100% audit-ready reporting integrity across stakeholder teams.

BJT GLOBAL | HR & People Operations Analyst

Dec 2023 – Aug 2024

- Operational Analytics:** Cleaned and automated business KPIs from enterprise HRMS platforms; developed interactive dashboards to track retention distributions and absenteeism anomalies.
- Executive Storylining:** Synthesized complex operational data into actionable executive storyline presentations with statistical graphs to support strategic leadership planning.

BARBEQUE NATION HOSPITALITY | Management Trainee – Operations Analytics

Jun 2022 – Oct 2023

- Staffing & Diagnostic Analytics:** Leveraged advanced Excel (Power Query M transformations, Power Pivot, Dynamic Arrays) to model unit throughput, driving a 25% operational productivity gain.
- Retention Optimization:** Built structured performance tracking dashboards from multi-unit datasets, directly contributing to a 20% reduction in operational turnover.

KEY BANKING & FINANCIAL ANALYTICS PROJECTS

Retail Credit Risk Scoring & Default Prediction (PD Model) | Python, Scikit-Learn, XGBoost, WOE/IV, SMOTE

Credit Analytics

- Risk Scorecard:** Developed binary classification credit scoring models on 100,000+ loan application records; engineered Weight of Evidence (WOE) and Information Value (IV) transformations to optimize credit risk feature selection.
- Default Mitigation:** Trained XGBoost & Logistic Regression models handling class imbalance via SMOTE; achieved 0.86 AUC-ROC and established optimal risk cut-offs, reducing projected default loss by 16% while maximizing loan approval rate.

Digital Banking Transaction Analytics & Churn Prediction System | SQL, Python, Power BI, RFM Segmentation

Customer Analytics

- Transactional SQL Pipeline:** Extracted and aggregated 50,000+ multi-table banking transaction records using SQL CTEs and Window Functions; computed RFM metrics and liquidity decay indicators to detect account dormancy.
- Churn Engine & BI:** Built Random Forest classification model predicting customer churn with 84% recall; developed interactive Power BI drill-down dashboard enabling relationship managers to execute personalized retention interventions.

Financial Portfolio Risk Optimization & Stress-Testing Engine | Python, NumPy, PuLP, Advanced Excel

Quantitative Risk

- Quantitative Risk Engine:** Formulated quantitative asset allocation models in Python implementing Markowitz Mean-Variance optimization, Monte Carlo simulations (10,000 runs), Sharpe ratio maximization, and Value at Risk (VaR) stress-testing.
- Scenario Sensitivity:** Engineered automated scenario stress-testing matrices evaluating portfolio resilience across interest rate shifts and macroeconomic volatility scenarios.

Real-Time Financial Transaction Fraud & Anomaly Detection Pipeline | Python, Isolation Forest, LightGBM

Fraud Analytics

- Anomaly Detection:** Engineered an unsupervised and supervised anomaly detection pipeline on highly skewed financial transaction data (0.17% fraud prevalence); achieved 0.88 PR-AUC, cutting false-positive alert fatigue by 22%.

TECHNICAL SKILLS & DOMAIN COMPETENCIES

Programming & Querying: Python (Pandas, NumPy, Scikit-Learn, SciPy, Matplotlib, Seaborn), SQL (MySQL, PostgreSQL, Window Functions, CTEs, Complex Joins, Query Optimization), R (Statistical Foundations).

Banking & Risk Analytics: Credit Risk Modeling (PD / LGD), Scorecard Development, RFM Customer Segmentation, Financial Anomaly & Fraud Detection, Churn Prediction, Time-Series Forecasting, A/B Hypothesis Testing.

BI, Financial & Analytics Tools: Power BI (DAX Measures, Star-Schema Relational Modeling), Tableau, Advanced Excel (Power Query, Power Pivot, Financial Modeling, Scenario & Sensitivity Analysis, Dynamic Arrays), Alteryx.

Data Engineering & Platforms: Automated ETL Pipelines, Schema Validation, Audit Reconciliation Controls, Fact-Dimension Modeling, Git, GitHub, Streamlit, Cloud Concepts (AWS EC2 Foundations).

CERTIFICATIONS & ACCREDITATIONS

2026 • Introduction to Alteryx for Data Analytics & ETL Automation — DataCamp (Jonathan Cornelissen)

Certified

2025 • Complete Data Analyst Bootcamp: Python, SQL, Power BI & Applied ML — Udemy (Krish Naik)

Certified

2024 • Commercial Banking & Financial Analytics Virtual Experience — JPMorgan Chase & Co. / Forage

Completed

2023 • Microsoft Excel: Advanced Analytics, Dashboards & Financial Modeling — Udemy (Warrick Klimayts)

Certified
