PROFILE

Data Analyst with hands-on experience in end-to-end data collection, preprocessing, exploratory data analysis, and predictive modeling. Proficient in Python (Pandas, NumPy, Matplotlib), SQL, Power BI, and Excel for transforming complex datasets into actionable business insights. Experienced in designing automated data pipelines, building analytical dashboards, and collaborating with cross-functional teams to deliver evidence-based decisions. Familiar with machine learning techniques including classification models and risk scoring. Currently pursuing M.Sc. in Analytics at TISS Mumbai, with strong skills in statistical analysis, data visualization, and clear documentation of analytical methodologies.

EDUCATION

YEAR	DEGREE	INSTITUTE	% / CGPA
2025–2027	M.Sc. in Analytics	Tata Institute of Social Sciences, Mumbai	Pursuing
2019–2022	Bachelor of Science in Hospitality Administration	AIHM, Chandigarh	74%
2018	Intermediate (12th)	Little Scholars, Kashipur	74%
2016	High School (10th)	Little Scholars, Kashipur	8.2

WORK EXPERIENCE

Duration: 2 years 02 months

OrgaKnow	Data Science Intern – AI Solutions	Dec 2025–Present
----------	------------------------------------	------------------

- Collected, standardized, and preprocessed 1,000+ workforce records from inconsistent multi-source datasets using Python, building clean audit-ready analytical layers for downstream reporting.
- Performed exploratory data analysis on structured HR datasets to identify anomalies, validate data quality, and surface actionable trends supporting business decision-making.
- Built automated Python data ingestion and schema validation pipelines, reducing manual preprocessing effort by 60% and accelerating analytical reporting cycles significantly.
- Developed refresh-ready analytical layers and structured exports to support dashboard development, recurring reporting, and predictive model input requirements.
- Implemented reconciliation controls including roll-up validation and period-over-period testing to ensure accuracy and consistency across all analytical outputs.
- Documented data workflows, preprocessing methodologies, and reusable templates clearly to standardize quarterly analytical processes across the team.

BJT GLOBAL	HR Generalist	Dec 2023 – Aug 2024
------------	---------------	---------------------

- **Data Collection & Preprocessing:** Gathered and cleaned workforce metrics from HRMS platforms to build Power BI and Excel dashboards tracking KPIs including retention, attendance, engagement, and performance trends.
- **Exploratory Analysis:** Analyzed employee datasets to identify patterns in attrition, absenteeism, and productivity anomalies, delivering data-driven insights to support organizational planning and HR strategy.
- **Cross-Functional Collaboration:** Partnered with departmental stakeholders to define data requirements, interpret analytical findings, and present insights effectively to both technical and non-technical audiences.

BARBEQUE NATION	Management Trainee – Asst. Manager (L&D;)	Jun 2022–Oct 2023
-----------------	---	-------------------

- **Performance Optimization:** Leveraged Python (Power Query, Power Pivot, Dynamic Arrays) for data extraction, preprocessing, and dashboard-driven performance monitoring to analyze workforce trends and diagnose productivity gaps.
- **Dashboard & Reporting:** Built data-driven performance dashboards tracking training and operational KPIs, contributing to a 25% improvement in workforce productivity and 20% reduction in employee turnover.
- **Documentation:** Documented training content, analytical methodologies, and performance findings clearly for cross-functional stakeholders, ensuring accurate and consistent knowledge transfer across the organization.

PROJECTS

Python AirBnB Pricing & Trend Analysis	Conducted end-to-end EDA on Paris AirbnB listings using Pandas and NumPy to identify pricing patterns, availability trends, and neighborhood-level anomalies. Built Matplotlib and Seaborn visualizations to communicate findings clearly and support data-driven decision-making.
Python AI Retention Intelligence	Developed a predictive attrition risk model using Python , applying feature engineering and classification techniques to identify at-risk employees based on behavioral and engagement indicators, enabling proactive retention interventions.
SQL Restaurant Revenue & Order Analytics	Analyzed structured restaurant transactional data using SQL joins, aggregations, and subqueries to derive revenue patterns, order trends, and operational insights from a relational database, supporting data-driven business decisions.
Power BI Multi-Domain Performance Dashboards	Built interactive Power BI dashboards across Zomato, IPL, and Superstore datasets using DAX and data modeling to track KPIs, performance trends, and operational metrics, enabling actionable insights for cross-functional teams.
Python Financial Portfolio Analysis (Groww)	Built automated data cleaning, validation, and transformation workflows in Python from raw Excel sources to create structured analytical outputs. Developed Power BI visualizations for investment performance, return modeling, and portfolio insight reporting.

Excel Stock Portfolio Management & Risk Analytics	Developed an Excel -based portfolio analytics workbook covering return modeling, risk metrics (volatility, Sharpe ratio), correlation analysis, and portfolio optimization across 5 equities using advanced formulas, pivot automation , and variance analysis.
SKILLS	
Data Analytics Tools	Power Query (M transformations), Power Pivot (DAX, data modeling), Dynamic Arrays, Financial dashboarding, Variance analysis, Pivot automation
Programming & Data Science	Python (Pandas, NumPy, Matplotlib, Seaborn), R (basic)
Soft Skills	Analytical Thinking, Problem-Solving, Cross-functional Collaboration, Adaptability, Clear Communication
ML & Statistics	EDA, Feature Engineering, Classification Models, Risk Scoring, Statistical Analysis, Predictive Modeling
Version Control & Deployment	Git, GitHub, Streamlit, Gradio, Flask
Database & Cloud Platforms	MySQL PostgreSQL Relational Data Modeling Query Optimization AWS EC2 (Foundational) Cloud Data Concepts CSV-Based Data Pipelines
HR Tools	HRMS, HRIS, LMS, Frontlyn, Betterplace, ZingHR, ZingLearn
